

**IN THE SPECIFICATION:**

Please replace the third full paragraph of specification page 4, which ends of page 5, with the following replacement paragraph:

In normal circumstances, when injury, pain or illness is not being treated, the [[pouch]]item 26 can be removed from the puppet 30 and the puppet 30 can then be used as a normal hand puppet or toy by the child in the ordinary course of daily activities. In this way, the puppet 30 can become a well-known toy for the child, and the familiarity of the puppet will enhance the likelihood that the child will allow an adult to treat the injury or painful site and will feel comforted thereby when the need arises and the hot or cold pack is inserted into the belly pouch.
